Have you tried Colgate 100?

Students reading the bulletin board.

Mr. Garner assists L.P.N. students.

Eating again girls?

A little bit more to the left.

GRADUATION, 1967

Guest Speaker, Senator Robert A. Morgan

He finally made it

For these stones are the foundation upon which we will
build our future . . .

AGRICULTURAL BUSINESS TECHNOLOGY

The two-year Agricultural Business Curriculum is designed to give the student a thorough understanding of business principles and procedures as they relate to agricultural products, services and supplies. The course is well balanced with study in human behavior, business techniques, and basic agriculture procedures.

Upon completion of this course the student is awarded the Associate of Applied Science Degree in Agricultural Business Technology by the Department of Community Colleges under the North Carolina State Board of Education.

Any minute now!

AGRICULTURE RESEARCH

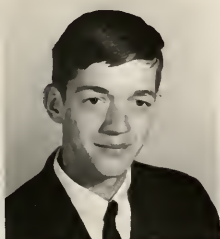

The curriculum in Agricultural Research Technology will prepare students for entry into the extremely important and rapidly growing field of agricultural research—involving the development, testing, production, and use of pesticides, chemicals, biologicals, plant strains, and animals. Governmental and industrial agencies conduct basic and developmental research on a wide variety of agricultural materials, products, and methods. the scope of activities within the field is practically unlimited.

ELECTRONICS ENGINEERING TECHNOLOGY

The two-year Electronics Engineering Technology Curriculum provides specially equipped laboratories where students develop necessary skills with tools and instruments to analyze circuits using vacuum tubes and transistors, how to trouble-shoot an electronic circuit, and how to make needed repairs or replacements.

Upon completion of this course, the student is awarded the Associate of Applied Science Degree in Electronics Engineering Technology by the Department of Community Colleges under the North Carolina State Board of Education.

INDUSTRIAL MAINTENANCE-ELECTROMECHANICAL

This curriculum will provide a training program in the basic knowledge, fundamentals, and industry practices in the maintenance and repair of industrial machinery and electromechanical equipment. With the industrial growth of North Carolina and the variety of machinery and equipment used throughout the average manufacturing plant, qualified maintenance mechanics who have a basic knowledge of electrical-mechanical systems and their application are in constant demand.

MACHINIST

The one-year Machinist program trains students for employment in maintenance shop, the production industry, and other industrial shops in North Carolina. They are, also, needed in plant engineering departments, hospitals, schools, and similar agencies. These students are mechanically inclined and temperamentally suited to do highly accurate work that requires conception as well as physical effort.

Upon completion of this course the student is awarded a diploma by the Department of Community Colleges under the North Carolina State Board of Education.

It only hurts for a minute.

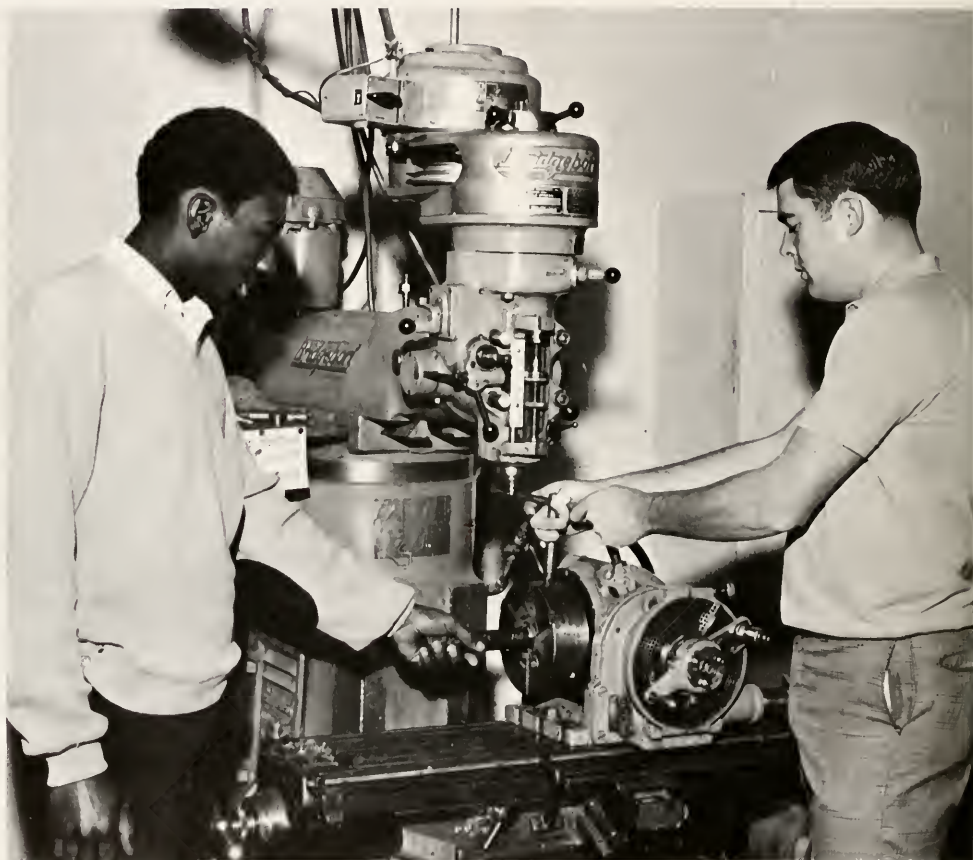

Anyone for a ride?

TOOLMAKER

This curriculum was prepared to meet a need for training of tool makers. Surveys recently completed in North Carolina show that many of the existing industries lack time and facilities for training enough tool makers to meet present and planned needs. Expanding industries already located in our state and new industries under development invariably express the need for skilled craftsmen who have the background, knowledge and potential to advance.

CENTRAL CAROLINA TECHNICAL INSTITUTE

DEPARTMENT OF COMMUNITY COLLEGES General Information

Central Carolina Technical Institute was established as Lee County Industrial Education Center in 1961 and was given technical institute status by the State Board of Education on October 2, 1965. It is one of more than twenty such institutions, operated by a local board of trustees, and the State Department of Community Colleges.

The purpose of the institute is to provide post-high school, vocational, and technical training; and general adult education for the residents of Central North Carolina. It is operated on a twelve months basis and is open from 8:00 a.m. to 10:00 p.m. on weekdays.

Programs of instruction for full-time students include:

Associate Degree of Applied Science Programs are six quarters in length and require a good academic background for successful completion. Theory and practice is given in mathematics, science, English, social science, and the area of specialization.

Diploma Programs are four quarters to seven quarters in length. The emphasis is on practice in the shop, laboratory or field to develop necessary skills. Related work in science, mathematics, and English is included in the course of study.

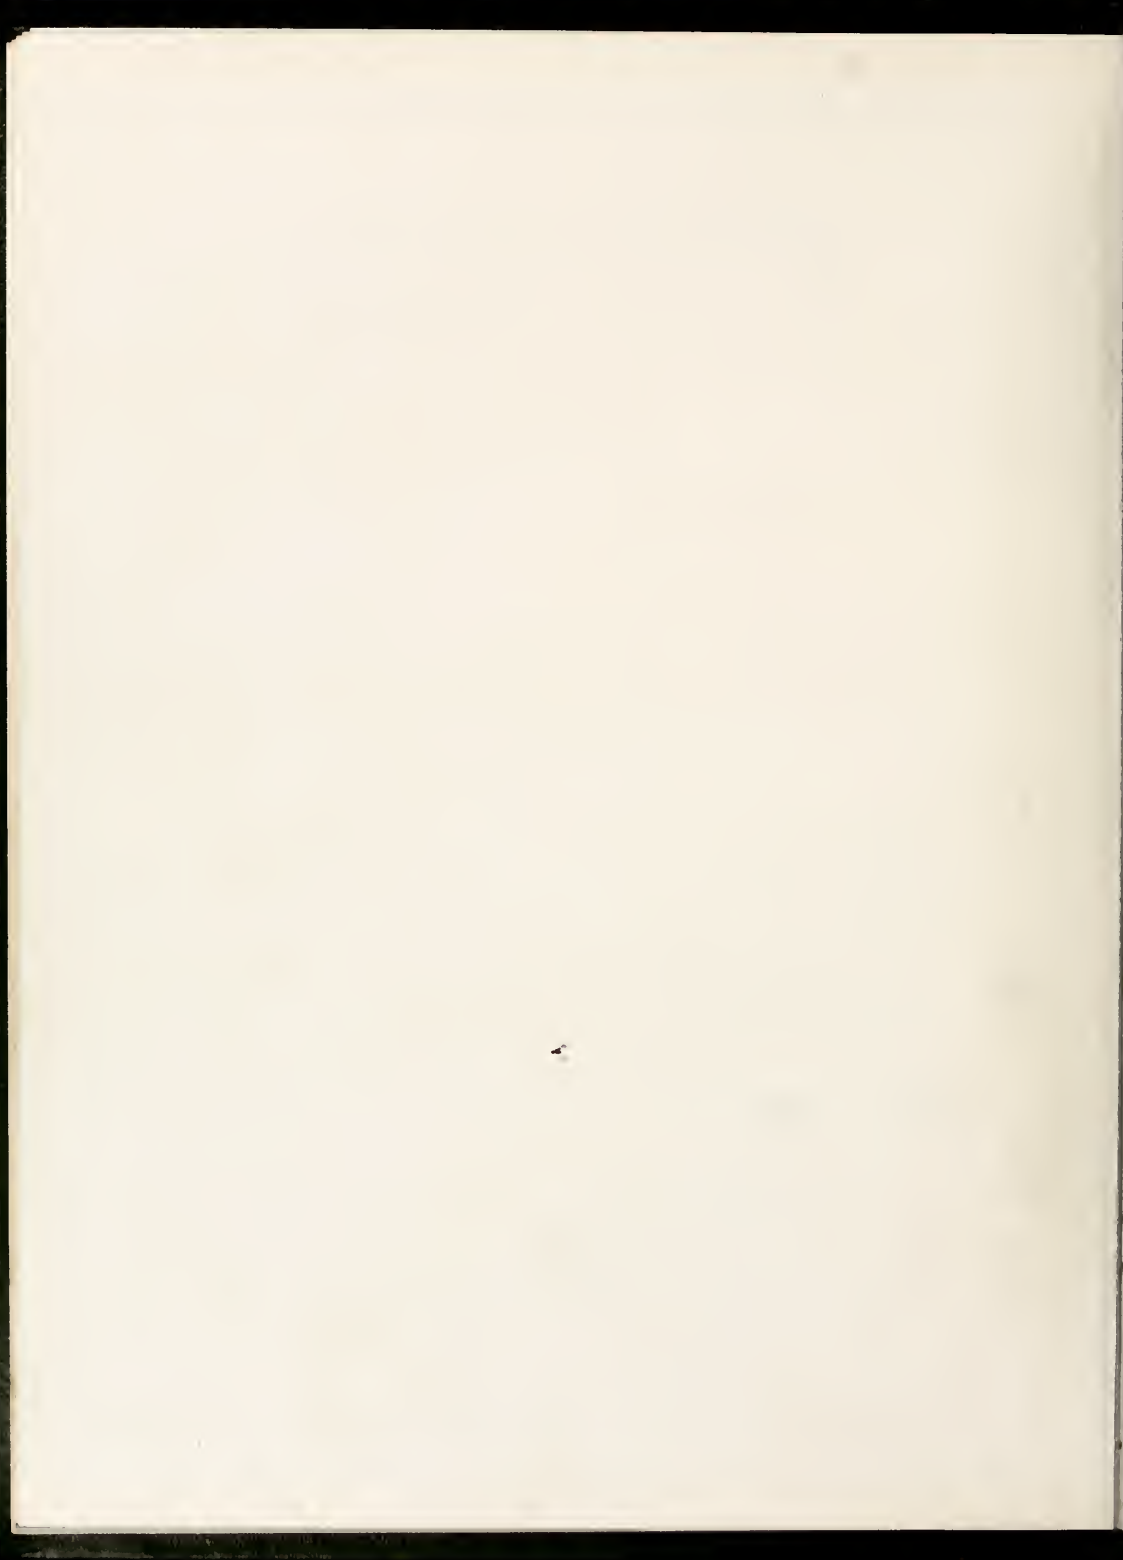

Tuition charges are \$32.09 (\$30.00 out of state) per quarter. Insurance is available for \$2.50 per year. Books and supplies average about \$30.00 making the total cost per quarter approximately \$65.00 (\$113.00 out of state).

Lee County is located in the heart of North Carolina on the edge of the Piedmont and Sandhills section. Sanford, the county seat, is only 45 minutes from Raleigh, the state capital.

Since the institute has no dormitories, housing can be arranged through the Student Personnel Office which maintains a list of approved accommodations.

An open door admissions policy is in effect at CCTI. Selective placement in the various curriculums will depend upon test results and amount of high school work completed. Persons wishing to enroll in courses should secure application blanks from their high school counselor or write: Director of Student Personnel, Central Carolina Technical Institute, Route 2, Box 27, Sanford, North Carolina 27330.
